

## Twinnabar cyclonic - low volume, low solvent load

The Twinnabar cyclonic spray chamber is a low volume spray chamber with a central transfer tube (or baffle), combining the benefits of the Twister and the Cinnabar. It combines excellent precision with a very fast washout.

- Material: Borosilicate glass
- Volume: 20ml
- Physical reproducibility ~1%
- Low RSD's due to highly accurate construction
- Application uptake range ~20 to 400 microlitres/min
